### PBX In A Flash Overview

Submitted by Admin on May 3, 2008 - 2:59pm.

Here is an illustration that details options and installations for PBX In A Flash, ISO's 1.1, 1.2, and 1.3.

### Testers for IAXModem/Hylafax

Submitted by Admin on February 9, 2008 - 10:14pm.

Well I now need some testers for the laxmodem/hylafax portion of the install-fax program for PIAF. I am releasing an alpha version for testing. This should provide you with a fully functional inbound fax using IAXMODEM. What this means is that inbound faxes should be set to extension 8000 and when a fax is received you should see an email with a pdf attached sent to root@localhost.

## First Post

*Submitted by Admin on February 9, 2008 - 9:47pm.*

Well I thought I might add a sort of developers diary so the community can get a feel for what is going on. Yes that is me to the right a "number of years ago"! Time flies these days with PIAF having been out less than 3 months and there is still much to be done. I have been wrestling with adding hylafax, iaxmodem, and avantfax to an automated install script.
